OBJECTIVE

A motivated and enthusiastic student seeking an opportunity as a trainee or developer to gain valuable hands-on experience. Committed to learning new technologies and contributing to organizational growth while strengthening practical skills in a dynamic and collaborative environment.

SKILLS

- **Language:** Python, Java
- **Tools:** Git, PyCharm, VS Code
- **Database:** MySQL
- **Gen AI (Beginner):** LLM, RAG, LangChain

PROJECTS

- **Enterprise RAG Knowledge Base Engine**
  - Developed an AI-powered backend system for intelligent document-based question answering.
  - Implemented document ingestion, text chunking, embedding generation, and semantic similarity search.
  - Integrated an LLM with retrieved context to generate accurate and context-aware responses.
  - Built REST API endpoints using FastAPI for processing user queries.
  - Implemented structured JSON responses and validation to improve reliability and reduce hallucinations.

  Tech Stack: Python, FastAPI, Embeddings, LLM, RAG

EDUCATION

- **Bachelor of Engineering in Computer** 2026
  Indira College of Engineering and Management
- **HSC** 2023
  BJS
  75%
- **SSC** 2021
  HA School
  83.6%

EXPERIENCE

- **CodSoft** 10/12/2025 – 10/01/2026
  Python Developer
